

What can you make with this interactive light wall?

STEP 1

- Turn a dial. Keep turning it. Do you see the colors change? It's so satisfying to just turn one dial in either direction through the color spectrum.

STEP 2

- Can you make a pattern? Something with triangles, hexagons, stars? Can you write your name? Design a sunset? A house? A garden? What else can you make?

STEP 3

- Press the BLUE button to reset (press for 1 second and release).
or
- Press the GREEN button to change canvases.

The Everbright is a modern re-imagining of the giant Lite-Brite, with dials that change hundreds of colors. Conceived by designer-neuroscientist Dr. Alan Rorie of Hero Design, it considers the integration of the hands and eyes in the development of humankind. This Everbright was made by artisans in Sacramento, California.
